

University of Alaska Land grant bill, to help the University gain the economic means to support such important endeavors. But more on that in the future, following committee review of the legislation, likely this fall.

I also want to thank and publicly recognize the work of Ronald Spatz, the executive editor and founding editor of the review for all of his efforts on its behalf. Mr. Spatz, currently professor and chair of the University of Alaska Anchorage's Department of Creative Writing and Literary Arts and director of UAA's honors program, has been a member of the faculty since 1980. A professor, who has been recognized with commendations for "Outstanding Leadership" by the University's Board of Regents and the President of the statewide system, Mr. Spatz is the former chair of the University of Alaska Statewide Assembly, president of the UAA Assembly and the vice president of the Faculty Senate. He is the winner of two university-wide teaching awards: The Chancellor's Award for Excellence in Teaching and the Distinguished Teacher of the Year Award presented by the UAA Alumni Association.

Mr. Spatz, a film maker and writer, besides editor, has produced, directed, photographed and edited a range of short subject and expressionist documentary films for children and adults. Several of the films are in national distribution; his film, "For the Love of Ben," was broadcast nationally on public television and his stories and articles have appeared in a host of publications. He has received a total of more than 35 individual and project grants for his works.

For the future, due to a grant from the National Endowment for the Arts, which has provided three major awards (grants) to the publication, AQR this fall will be issuing a special anthology. "Intimate Voice, Ordinary Lives: Stories of Fact and Fiction."

Mr. President, Alaska, in fact all of America, is far richer artistically because of the review's presence over the past 15 years. It truly is a window for Americans to view society in Alaska at the close of the 20th century, and a worthy stage for the serious works of all writers. I commend it and its contributors for its many achievements, and I know all members of the U.S. Senate join me in wishing it continued literary success.●

WOMEN'S BUSINESS DEVELOPMENT CENTER

●Mr. DURBIN. Mr. President, I rise today to commend the Women's Business Development Center for the vital role it has played in accelerating women's business ownership and strengthening the impact that women have made on our economy.

The Women's Business Development Center is a nationally-recognized not-for-profit center devoted to providing services and programs that support and

increase women's business ownership. Founded in 1986, more than 30,000 business owners in six States, including my home State of Illinois, have benefited from the program. The services range from counseling to workshops to entrepreneurial training.

Today, thanks to efforts by organizations such as the Women's Business Development Center, there are over 7.7 million women-owned businesses in the United States, generating \$2.3 trillion in sales. Women business owners now employ one in every four U.S. company workers. There is no doubt that women in business today are playing a prominent role in stimulating economic growth both at home and abroad.

On September 12 of this year the Women's Business Development Center will celebrate its 11th anniversary. As the Center moves into its second decade of service to women business owners, I am proud to recognize its impressive achievements.●

ARMY SGT. KELLY S. YARDE

●Mr. LUGAR. Mr. President, I rise today in recognition of Army Sgt. Kelly S. Yarde, who hails from Evansville. Sergeant Yarde, who is currently serving in Bosnia with Operation Joint Guard, was moved by the sadness he saw in the faces of Bosnia's children each time he went out on patrol. In response, he appealed to the people of his hometown and surrounding areas, asking for donations of school supplies, toys and sporting goods that he could give to these children.

Local media helped to publicize Sergeant Yarde's plea, and the community responded in magnificent fashion. Hundreds of donations have already poured in, and are continuing to arrive at collection bins set up at local businesses. Some of the gifts have already been shipped to Bosnia, and Sergeant Yarde has, on his own time, taken them to orphanages and refugee centers.

Americans are, by their nature, very generous people. The fact that we can not solve every problem in the world should not prevent us from solving at least some of them. I am pleased and proud that Sergeant Yarde had the foresight to identify a problem that he could help to solve, and had the faith in his community to ask for help in solving it. I am equally pleased that the people of Evansville and the surrounding area responded so generously to Sergeant Yarde's plea on behalf of the children of Bosnia.●

RECOGNITION OF SOUTH DAKOTA SOYBEAN GROWERS ON THE DE- VELOPMENT OF SOYGOLD

●Mr. JOHNSON. Mr. President, I want to take this opportunity today to recognize the important achievements of SD soybean growers in creating new uses for their agricultural products.

Freeman Coop Oil/Fertilizer in Freeman, SD, recently became the first retail marketer of petroleum to offer

SoyGold, a new lubricity additive in premium diesel fuel. SoyGold is a low blend of soybean methyl esters manufactured from 100 percent soybean oil for both on-farm and commercial use. The additive was developed with the use of check-off dollars, which allow farmers to work together to develop new uses for their products. The soybean growers have also worked to test soydiesel for mass transit bus systems, underground mining, and other innovative possibilities.

SoyGold was developed by Ag Processors, Inc. in Omaha, NE, and will be promoted and marketed throughout seven Midwestern States initially. Bill Pape, the general manager of Freeman Coop Oil/Fertilizer, is the first to offer the product to his customers. Dennis Hardy, the chairman of the South Dakota Soybean Council, worked hard to bring this new product to the market. All of these individuals, and many more, deserve credit for their efforts to make SoyGold a reality.

SoyGold is an outstanding example of the way that South Dakota's soybean farmers and their various associations can cooperate and communicate to create an exciting new product which will build demand for soybeans. Such products demonstrate the way that farmers are adapting to the changing agricultural marketplace, and I congratulate them on their foresight, their enthusiasm, and, of course, their accomplishment. Moreover, SoyGold is not only good for South Dakota farmers, but it also benefits us all by reducing harmful emissions.

Mr. President, there are few industries working as hard to create new products and new markets as agriculture. The South Dakota soybean growers whose efforts created SoyGold are to be commended, and I ask you to join me in congratulating them on their success.●

DR. EUGENE SHOEMAKER

●Mr. McCain. Mr. President, I would like to honor the passing of one of the world's most renowned scientists. Eugene Shoemaker and his wife Carolyn, both residents of Flagstaff, AZ, were involved in a tragic car accident in Central Australia on July 18, 1997. Gene was fatally injured; Carolyn survived the accident sustaining broken ribs, a broken wrist and a dislocated shoulder. They were in the field pursuing their lifelong passion of geologic studies to help understand impact craters.

"Gene" is credited with having almost single-handedly created planetary science as a discipline distinct from astronomy. He brought together and applied geologic principles to the mapping of planets, which resulted in more than three decades of discoveries about the planets and asteroids of our Solar System. He was the recipient of the 1992 National Medal of Science, the most prestigious scientific honor bestowed by the President of the United States, then George Bush.
